INDEX TO GEOPHYSICAL ABSTRACTS 96–99

JANUARY–DECEMBER 1939

COMPILED BY V. E. CLEVER

A

	No.	Abst.
Alder, J. L., Improvements in seismic prospecting in 1938 (3)	98	5032
Akimov, A. T., Instruction for applying the direct-current electrical method of prospecting in regions of permanently frozen ground (4)	99	5224
Alekseev, V. V., Experimental investigation of ondometric transmitters (4)	98	5072
Allen, M. W., Descriptive catalog of earthquakes of the Pacific Coast of the United States, 1769 to 1928 (9)	98	5135
Alpin, L. M., Contribution to the theory of electrical coring of boreholes (9)	96	4858
Amaral, I. C. do, Magnetic prospecting in the northern part of Santa Catharina (9)	96	4862
American Askania Corporation, Gravity meter (1)	96	4749
American Association of Petroleum Geologists, Electrical well logging (4)	99	5221
Anderson, E. M., Crustal layers and the origin of magmas (7)	98	5105
Andreev, B. A., Geological significance of the gravity map of Karelia, of Finland, and of the Leningrad region (1)	96	4750
Angenheister, G., Investigation of the subsoil with the aid of sinusoidal ground oscillations (3)	96	4779
Anthoine, Georges, On the gravimetrical cruise of the submarine *Espoir* in the southwestern part of the occidental basin of the Mediterranean Sea in 1936 (1)	99	5168
Aramata, Mituo, On the propagation of shock through sand on the beaches of Iwanai and Isikari (3)	98	5044
Arctowski, Henryk, Geothermic researches made at Boryslaw (6)	99	5228
Arnold, H. H., Jr., Salem oil field, Marion County, Ill. (8)	99	5256
Askania-Werke Akt.-Ges., Apparatus for measuring gravity differences, German patent 650,566 (10)	97	5001
—— Apparatus for measuring gravity differences, German patent 661,406 (10)	97	5002
—— Elastic pendulum, in particular for measuring gravity, German patent 661,497 (10)	97	5003
—— Improvements in or relating to magnetic balances for field use, British patent 501,974 (10)	98	5153
—— Apparatus for measuring gravity differences, German patent 674,167 (10)	99	5295
Athy, L. F., Method of electrical prospecting, U. S. patent 2,172,271 (10)	99	5287
Ayre, R. S., Experimentally determined dynamic shears in a 16-story model (3)	96	4800

B

Babcock, Earl, Electrical logging apparatus, U. S. patent 2,159,418 (10)	98	5150
Bancroft, Dennison, Elasticity and internal friction in a long column of granite (3)	96	4782
—— The elasticity of certain rocks and massive minerals (3)	96	4783
Baranov, Vladimir, On the anomalies of gravity in the region of Alençon (1)	96	4759
Barret, W. M., Structures in Sparta-Wilcox trend disclosed by magnetics (2)	98	5019
—— Electrical apparatus and method for geologic studies, U. S. patent 2,172,688 (10)	99	5290
Bartels, J., Harmonic analysis of diurnal variations for single days (2)	98	5020

	No.	Abst.
Barth, T. F. W., Radium and the petrology of certain granites of Finland (5)	97	4951
Bartley, M. W., Hematite deposits, Steeprock Lake (4)	99	5219
Barton, D. C., Gravitational methods of prospecting (1)	98	5006
—— Petroleum geophysics (7)	98	5096
Bateman, H. B., Rayleigh waves (3)	96	4780
Bazzoni, C. B., Electrical-prospecting method and apparatus, U. S. patent 2,167,630 (10)	99	5284
Beattie, C. H., Jr., Orientation apparatus, U. S. patent 2,149,716 (10)	97	4990
Bellamy, E. F., Epicenters of earthquakes, 1913–1932 (3)	98	5033
Benioff, Hugo, Observations with electromagnetic microbarographs (3)	99	5186
Bereskin, M., The effect of moisture on the thermal constants of some rocks (6)	96	4831
Bertrand, G., Principle of a method of rapid measurement of relative value of g (1)	96	4751
Bierens de Haan, D., New tables of definite integrals (9)	99	5263
Billings, M. H., Recent trends in geophysical exploration (7)	99	5246
Birch, Francis, Variation of seismic velocities within a simplified earth model (3)	96	4781
—— Elasticity and internal friction in a long column of granite (3)	96	4782
—— The elasticity of certain rocks and massive minerals (3)	96	4783
—— The variation of seismic velocities within a simplified earth model, in accordance with the theory of finite strain (3)	99	5187
Birnbaum, A. K., Automatic leveler for gravity-measuring instruments, U. S. patent 2,149,953 (10)	97	4992
Blau, L. W., Method of determining the dips of geological strata with substantially vertical reflections, U. S. patent 2,148,422 (10)	97	4987
—— Gravity balance, Canadian patent 2,160,824 (10)	99	5274
—— Seismic electric prospecting by means of continued waves, U. S. patent 2,156,259 (10)	98	5146
—— Electric earth transient in geophysical prospecting, U. S. patent 2,160,824 (10)	99	5274
—— Electrical-transient well logging, U. S. patent 2,165,213 (10)	99	5280
Blau, L. W.—Continued. —— Geophysical prospecting with short electromagnetic waves, U. S. patent 2,165,214 (10)	99	5281
Bock, R., On the second-order magnetic survey of the Reich and its preliminary results (2)	97	4900
Bohrtechniker Zeitung (editorial), Geology and geophysics discussed in the German society for oil prospecting (7)	97	4959
Boliden's Gruvaktiebolag, Apparatus for determining gravity, British patent 483,217 (10)	96	4884
—— Method of measuring gravity, British patent 493,404 (10)	97	4996
—— Improvements in or relating to the determination of relative plummet deviations for prospecting for minerals and other subterrestrial deposits, British patent 493,738 (10)	97	4997
—— Gravity-determining apparatus, Canadian patent 377,931 (10)	97	4999
—— Improvements in the determination of variations in the horizontal components of the force of gravity, British patent 504,999 (10)	98	5156
Boucher, F. G., Multiple gravity meter, Canadian patent 379,439 (10)	98	5158
Boulanger, J., On the determination of errors of a gravimetrical connection between two stations (1)	98	5007
Bowsky, M. C., Automatic compensator for geophysical devices, U. S. patent 2,142,555 (10)	96	4883
Brant, A. A., Interpretation of dip-needle surveys (2)	96	4768
Bruckshaw, J. M., A new geophysical instrument (4)	99	5220
Bullard, E. C., Seismic methods in submarine geology (3)	96	4784
—— Gravity measurements in Cyprus (1)	99	5167
—— Temperatures within the earth (6)	99	5229
Bullen, K. E., On the epicenter of the 1934 Pahiatua earthquake (3)	96	4785
—— Composition of the earth at a depth of 500–700 km. (7)	96	4832
—— Ellipticity correction and deep-focus earthquakes (3)	97	4916
—— A method of calculating epicenters of New Zealand earthquakes (3)	98	5034

	No.	Abst.
Bungers, Rolf, On the method of working out results of earthquakes close by (3)	98	5035
Burr, H. B., Apparatus for locating concealed conductive bodies, U. S. patent 2,167,490 (10)	99	5283
Byerly, Perry, Determination of deep-seated crustal structure in California (3)	96	4786
—— Near earthquakes in central California (3)	99	5188
Byrne, R., Model studies of vibrations of structures during earthquakes (3)	99	5218
C		
Cairns, W. D., Seismology from a mathematical viewpoint (3)	98	5036
Caloi, Pietro, Earthquake shocks with local origin, shocks at Cansiglio in October 1936, part 14 (3)	96	4787
—— Periodic analysis of seismic waves (3)	98	5037
—— Traveltimes near earthquakes (3)	99	5189
Chang-Hung-Chi, Measurements of gravity in the western part of the Chinese Yunnan (1)	99	5162
Chemical Engineering and Mining Review (editorial), Geophysics aids the examination of alluvial deposits (7)	97	4960
—— Geophysical surveying in northern Austrialia (7)	99	5241
Closs, H., The development of the governmental geophysical survey of Germany to the end of 1938 (7)	98	5097
Cockburn, H. C., Automatic leveler for gravity-measuring instruments, U. S. patent 2,149,953 (10)	97	4992
Collins, M. P., Local earthquakes in New England (3)	97	4917
Conrad, V., Results of cosmic physics (9)	99	5264
Continental Oil Co., Method of geophysical exploration, U. S. patent 2,144,812 (10)	97	4985
—— Wave record analyzer, U. S. patent 2,155,507 (10)	98	5144
—— Method and apparatus for making geological explorations, U. S. patent 2,158,198 (10)	98	5148
—— Means and method of making geophysical explorations, U. S. patent 2,164,196 (10)	99	5278
—— Method of electrical prospecting, U. S. patent 2,172,271 (10)	99	5287
Cordova, F. J., Geological instrument, U. S. patent 2,141,173 (10)	96	4878
Corkan, R. H., The analysis of tilt records at Bidston (3)	99	5190
Coulomb, Jean, Time interval between solar eruptions and magnetic storms (2)	99	5176
Cressey, G. B., Frozen ground in Siberia (7)	99	5236
Croll, J. C. H., Geophysics as applied to structural geology (7)	97	4958
D

Dauvillier, A., Internal structure of the earth and the origin of continents and oceans (7)	96	4833
Davidson, J. L., A geophysicist in the Netherlands Archipelago (7)	96	4834
Davison, Charles, Earthquake sounds (3)	96	4788
—— Studies on the periodicity of earthquakes (9)	96	4859
Davison, E. H., Field determination of rocks (9)	98	5123
Day, A. L., Volcanoes, geysers, and hot springs (7)	96	4835
Denisevich, V., Changes of the resistances of rocks depending on their section (4)	96	4825
Devlin, J. J., The electromechanical transducer in the new Benioff seismograph (3)	96	4789
DeWolf, F. W., Stratigraphic studies of Baker-Glendive anticline, eastern Montana (8)	97	4973
Diakonov, D. I., Geophysical methods of prospecting (7)	96	4844
Dix, C. H., Interpretation of well-shot data (3)	97	4918
—— Refraction and reflection of seismic waves (3)	98	5038
Doborzynski, Dobieslaw, Short-wave reception in limestone caves (4)	98	5073
Dobrin, M. B., Recreating geological history with models (8)	98	5117
Doherty, J. W., Seismic exploration for oil (3)	99	5191
Dominion Observatory, Seismological report from New Zealand stations (3)	98	5062
Dudley, O. E., System for geological explorations, U. S. patent 2,147,643 (10)	97	4986
Dugast, Georges, Time interval between solar eruptions and magnetic storms (2)	99	5176
Duthoux, P. V., Geomagnetic study of the Hourt-massif (2)	97	4901
E		
Earthquake notes (9)	97	4977
—— Earthquake notes (9)	98	5124
—— Earthquake notes (9)	99	5265

	No.	Abst.
Éblé, Louis, Values of magnetic elements at Chambon-la-Forêt Observatory on January 1, 1939 (2)	97	4902
Eby, J. B., Progress and trends in geochemical methods of prospecting (7)	99	5238
Edgerton, A. K., Geophysical instrument, U. S. patent 2,160,356 (10)	99	5273
Eller, W. H., A new recording tiltmeter (3)	99	5192
Elsasser, W. M., On the origin of the earth's magnetic field (2)	97	4903
—— Origin of the earth's magnetic field (2)	97	4904
Elwerath Gewerkschaft, Locking device for torsion-balance beams, German patent 663,042 (10)	99	5292
Engineering Laboratories, Inc., Method of and apparatus for determining the dip of the earth's substrata, U. S. patent 2,133,786 (10)	96	4870
—— Gravity meter, U. S. patent 2,150,405 (10)	97	4994
—— Method and apparatus for seismic prospecting, French patent 834,841 (10)	97	5005
—— Method for seismic prospecting, U. S. patent 2,156,198 (10)	98	5145
Engineering Research Corporation, Electrical apparatus and method for geologic studies, U. S. patent 2,172,688 (10)	99	5290
England, J. L., Improved torsion gravity meter (1)	96	4767
—— An improved torsion gravity meter (1)	97	4899
English, W. A., Seismograph prospecting for oil (3)	97	4919
Evans, R. D., The radium content of marine sediments from the East Indies, the Philippines, and Japan, and of the Mesozoic fossil clays of the East Indies (5)	96	4830
—— Intercalibration and comparison in two laboratories of measurements incident to the determination of the geological ages of rocks (7)	98	5118
Eve, A. S., Applied geophysics in the search for minerals (9)	97	4978
—— Geophysical methods, introduction (7)	98	5098
Evjen, H. M., Electrical methods of geophysical exploration (4)	97	4940
—— Electrical method of geophysical exploration, U. S. patent 2,169,685 (10)	99	5286
—— Electrical method of geophysical exploration, U. S. patent 2,172,557 (10)	99	5288
Ewing, Maurice, Topography of the buried land surface of the former continent of Appalachia (3)	96	4790
—— Geophysical investigations in emerged and submerged Atlantic Coastal Plain, part 4 (3)	96	4791
—— Geophysical investigations in the emerged and submerged Atlantic Coastal Plain, part 3 (3)	97	4920
—— Structural geology of the Bermuda Islands (3)	98	5070
